

Football

Complete your National league or club through learning new techniques that would increase the skilfulness and capability of the team through science.

If you are interested:

Forward your name, the clubs name, country and the federation via

korrektpi@yahoo.se

Your message should only contain the most important information stated above!

This service is only available for one club/team or federation for national team!

Football and knowledge

The new insight will improve and develop the football player.

Through mathematical calculations and formulae I have put together new techniques and tactics that would improve the individual player.

1. Goalkeeper: Especially during penalty and otherwise!
2. Improve forward-player, defensive-player or free player by learning to score a goal much easier than they did before.
3. Improving the clubs economy by creating the best goalkeeper & the best forward player in the world.

By studying a player and analysing him/her, I will put up an individual program that would be in the player's best interest.

This information would help your team to progress or even win the forthcoming Olympics and the World Cup.
